Watch video

Put very simply, 'Make a Film in One Day' is:

"Make a film from beginning to end in one day, direct it, act in it and film it yourself."

Working out the scenario and shotlist, filming and sound, acting and directing, finding the best locations, accessories and props,... you do everything.

You start from a blank sheet, and skilled **film professionals** lend you a helping hand.

(§) 3 - 7 hours (§) 10 - 200

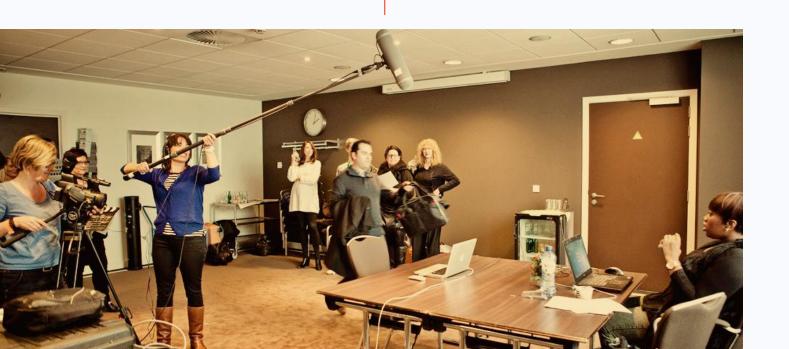

In **small teams** (+/- 12 people) you go to work to put together your film.

The **scenario** is worked out, a **shotlist** is drawn up.

So..., what do you film?

That is entirely down to you! Your own **commercial** or **newsflash**. A **comedy, horror or action movie? Fiction** or **company-related**?

Whatever you want...

(§) 3 - 7 hours (§) 10 - 200

DON'T ASPIRE TO BE THE BEST ON THE TEAM ASPIRE TO BE THE BEST FOR THE TEAM!

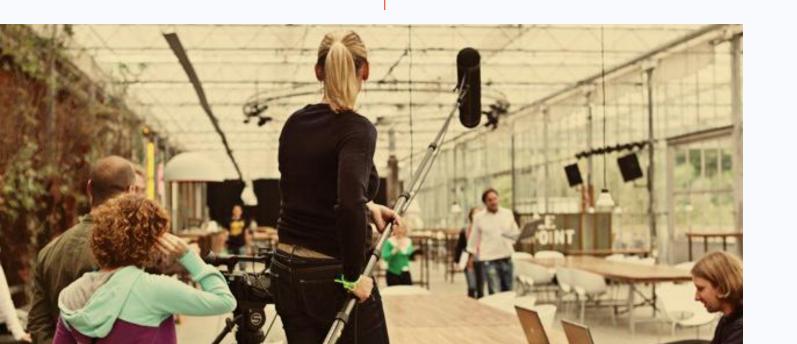

(§) 3 - 7 hours (§) 10 - 200

And then of course there is the filming itself. **Everyone joins in**, be it before or behind the camera! Because making a film also involves camera work, sound, light, direction, sets & props and... acting. Professional camera equipment is used to film.

When everything has been **recorded**, the film still needs **to be edited**. Titles, credits, sound effects,... are added. Luckily for you this is done by **professionals**.

Meanwhile the teams can enjoy a delicious dinner (optional).

CREATIVE PEOPLE BUILD STRONG BUSINESSES!

During Make a Film in One Day, all participants work towards a common goal: make a whole film within the allotted time. Make a Film in One Day stimulates communication, creativity and team spirit within your organisation in an innovative way.

And of course, as a company, you can choose to give the company's values a key role in the films. Working around themes such as collaboration, alignment, growth, etc. helps embed the message within your company. Also, it's incredible (yes, even hilarious) to see your colleagues on the big screen for the first time!
