# Virtual Reality - The Bomb

## VR - The Bomb

🕒 1 - 2 hours    👥 10 - 100

The Virtual Bomb is a team activity, in which **teamwork** is an absolute must to bring the game to a successful conclusion.

Obviously you cannot solve every problem yourself, you need to operate as a team, which means that you will have to both ask for and provide assistance.

One player is imprisoned in a **virtual room** with a ticking time bomb. The player has to try and describe the highly complex bomb to “bomb experts”, who only have a manual to help them decode the various riddles and puzzles inside the bomb.

Time is ticking,.... you need to keep your cool because the bomb has to be dismantled before the deadline expires!

**CREATIVE PEOPLE**  
**BUILD STRONG BUSINESSES !**

The Virtual Bomb is for companies that like to get in touch with new technologies. With the Virtual Reality glasses, you imagine yourself in a completely new world that captures the imagination enormously.

This activity is built around the principle of shared information: the person with the VR glasses has one part of the information, the other team members have the other part. So to be successful, it is necessary to have good communication. Of course, the glasses are passed around, everyone has the opportunity to get acquainted with VR.
